2. Point - After the player has placed a wager on pairs, trips or both the player receives three cards. The player then determines whether they would like to bet against the dealer by placing a wager equal to the pair wager on the point. The player is betting their point card is higher than the dealers point card. i.e. Player has a pair of threes and a six, Dealer has a pair of sixes and a four player win with six being the higher point.
